Ingress Protection Classification

Degree of protection indicated by the first characteristic numeral (Protection against solid)

Description	Short Definition	
0 Non-protected	No special protection	
1 Protected against solid objects greater than 50mm	A large surface of the body, such as hand (but no protection against deliberate access). Solid objects exceeding 50 mm diameter.	
2 Protected against solid objects greater than 12 mm	Finger or similar objects not exceeding 80 mm in length. Solid objects exceeding 12 mm in diameter	
3 Protected against solid objects greater than 2.5 mm	Tools, wires etc of diameters or thickness greater than 2.5 mm. solid objects exceeding 2.5 mm in diameter	
4 Protected against solid objects greater than 1.0 mm	Wires or strips of thickness greater than 1.0 mm. Solid objects exceeding 1.0 mm in diameter	
5 Dust protected	Ingress of dust is not totally prevented. But dust does not enter in sufficient Quantity to interfere with satisfactory operation of the equipment	
6 Dust Tight	No ingress of dust	

Ingress Protection Classification

Degree of protection indicated by the second characteristic numeral (Protection against liquids)

Description	Short Definition	
0 Non-protected	No special protection	
1 Protected against dripping water	Dripping water (vertically falling drops) shall have no harmful effect	
2 Protected against dripping water when tilted up to 15	Vertically falling drops shall have no harmful effect when the object is tilted to any angle up to 15 from its normal position.	
3 Protected against splashing water	Water falling as a spray at angle up to 60 from the direction shall have no harmful effect	
4 Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect	
5 Protected against water jets	Water protected by a nozzle against the enclosure from any direction shall have no harmful effect	
6 Protected against heavy water jets	Water projected in heavy jets shall not enter the enclosure in harmful quantities	
7 Protected against the effect of immersion	Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time	
8 Protection against submersion	The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer	

Note: Normally this will mean that the equipment is hermetically sealed. However with certain types equipment it can mean that water can enter but only in such a manner that its products no harmful effects.
