LED

bringing light closer to the task area

Too much light or too little, can lead to increased levels of fatigue in office. Optimizing energy usage without compromising on light levels and user well-being, becomes critical. Reducing ambient lighting and bringing light closer in the form of a tasklight makes a big difference – improving personal comfort, concentration and productivity.

A MICHAEL FOLEY DESIGN

versatile & personal

Lighting for personal spaces needs to be adaptable to individual choices and preferences. Addressing personal controls to further precision, NuLED and MioLED desklight offers easy adjustments in tilt and angle. It eliminates shadows and is more useful especially when it is being used in very low ambient light conditions.

High Mast & Poles

High Mast Lighting

High Mast lighting is currently the most efficient and cost effective way of illuminating large outdoor areas such as highways, railway yards, dock yards, parking lots, shopping centers, power plants, coal mines, warehouses, toll plazas and road junctions.

High Masts can be mounted at considerable heights, thus rendering uniform illumination to the entire area. It also enables easier installation and maintenance of luminaires due to motorized controls that lowers and raises the luminaires. The sleek High Masts lighting is also aesthetically superior to the conventional lattice structures or lower height poles.

Wipro Lighting offers comprehensive range of solutions in high masts. The range is available in standard heights, 12/16/20/25/30 metres. All these options support various luminaire combinations depending on lighting design requirements.

Poles

Poles are the backbone of efficient street lighting applications and urban city beautification projects. Town planners and urban developers today require poles which blend with modern city landscapes and provide a distinguished look to the area.

Wipro Lighting offers a wide range of products right from 5 metre to 12 metre poles with different bracket options (poles beyond 12 metres can also be provided on request). The solutions may vary for GI Octagonal Poles, Tubular Poles or Conical Decorative poles. We offer a wide variety of bracket options to suite the aesthetics of the landscape and the luminaires used.

The design and specification of the poles and the luminaires depend on the type of application.

high masts & poles

Wipro Lighting has a dedicated team of Lighting Design Engineers located across India to recommend a comprehensive solution as per customer requirements. For more Techno - Commercial details on Poles and High Mast Lighting, contact our nearest Branch or write to helpdesk.lighting@wipro.com.
